Bringing joy to the garden

Over 600 high-quality wooden
products by Palmako

Dear Customer,

Every time a year passes by we are surprised how quickly the time flies. Kids are growing up so fast, we remember situations and events like they were yesterday, but the truth is, they took place already five or even more years ago. The time is ticking and we need to manage with all the everyday struggle and issues. Luckily there is one place where we can admire all that we see in front of us and be in the moment whether with ourselves, the others or with the nature itself – this place is our garden.

In our garden we can stop the time if we want. We are the kings of our gardens, we are the designers who can draw or design the garden just the way we see it and want it to be. We can turn our garden into the best place to be and enjoy it just the way it is. Some of us like to make changes in the garden throughout the year - assembling maybe a new carport or a piece of furniture, add some flower boxes, plant new flowers etc. The others are maybe seeking for the quiet and calmness of just being in a green environment, doing nothing, just watching the sky and feel joy hearing birds singing. It is only a question of who we are, what we want and what we wish to do in our garden. It is possible to do both – one day you mow the lawn, clean up the tool shed that has not been cleaned for a year and trim the bushes. The next day you are all day long a little bit lazy on purpose and just watch your kids playing on the playground or sit in a pavilion and read a book. The evening ends with delicious dinner on the terrace with loved ones. Familiar feeling?

Why not just to listen to the voice inside of you and hear what it has to say. No worries if your inner voice tells you to take care of your garden, but you just do not know where to start. We are here to help you. Think about it, do you need an extra room in your garden, be it a shed for tools, a spacious and bright pavilion for brunches or a garden house for accomodating friends. You could protect your car from the sun and rain if parking them in a nice garage. Maybe in one corner of your garden should

be a playhouse or playground for your kids. You could have SPA treatments or spend splendid time with your friends in your own sauna right in the middle of your garden. Adding in your garden smaller items like fence panels, garden furniture, flower boxes and other you can turn your garden into a wonderland of your own.

Perhaps you have noticed that the catalogue in your hand is quite heavy. Our product range is very wide, this is why we have organized our products by categories on the side of the catalogue so you can easily find what you are looking for. Our products are made of the finest Nordic fir tree, which is known worldwide for its excellent properties. As wood is a renewable material by purchasing our products you are helping to support environmental-friendly attitudes and do at least a little good to our planet.

Wood is a natural material and to enjoy our products in the garden for a long time you will need to protect the wooden product against weather effects, wood-destroying fungi and insects. Therefore, we truly recommend using our product treatment service. Depending on the product type we are able to dip, pressure-treat or paint our products (initially white or grey painted). Please read more about treatment possibilities on pages 279-281.

We continually appreciate your feedback regarding our products and services and we are eager to know how you have used them. You are welcome to share your ideas, proposals and photos via social media with [#palmako](#) [#bringjoytothegarden](#) or share them privately with us by sending an e-mail to palmako@palmako.ee or via our homepage www.palmako.ee.

We wish all our customers a successful and goal-oriented 2023!

Ingrid Lamp
Marketing Manager

The joy of being in the garden

The garden – our connection with nature

We live our lives at crazy speeds amid droves of people and every day we become increasingly more alienated from nature. Going outdoors takes time and money and is an all around taxing experience. However, our ancient selves don't want to stop smelling the grass in the morning or seeing the light of the setting sun through tree branches. When we go back to the past along this line of heritage, we quickly reach our predecessors, who were peasants,

cattle breeders or hunters. Urbanisation is a new phenomenon in human history. A garden is often our last direct point of contact with nature, a reminder of the unity our predecessors felt with the surrounding environment. This feeling is deeply rooted in our subconscious and it makes the existence of a garden and time spent there so important for us.

The joy of being in the garden

We all strive to achieve ever-greater quality of life. Constantly juggling mountains of work and the need to spend time with our family forces us to look for balance between home and office, between reaping and sowing. It motivates us to emphasise our presence.

Our restless spirit and modern life force us out of our comfort zone – searching for greater value in life through social interaction and self-realisation.

Palmako doesn't build an artificial world with fake emotion and fake people. In the shape of the garden, Palmako extends quality living space, making it a special place in people's lives. Somewhere they live their real lives. A life which has meaning. Which is filled with quality time spent together, which we share with those closest to us. Somewhere we experience special moments.

We don't just make garden houses. We don't restrict ourselves to comprehensive garden solutions either.

We bring joy to the garden.

A garden is often our last direct point of contact with nature, a reminder of the unity our predecessors felt with the surrounding environment.

The many dimensions to garden life

The special moments in our lives are different and the roles gardens play in our lives are also different. A garden can be a place of relaxation where you hide from the world. Or it can be a meeting place where you discuss life with your loved ones. A garden can be the place where you devote yourself to your hobbies.

Every material has its character and soul. Wood is warm and beautiful and we understand its life cycle.

A beautiful garden can be our best feature for impressing neighbours and passers-by. It can also be a practical place for growing organic fruit and vegetables for our own use. We believe that quality time has many angles and colours, like an eventful life. We do not make decisions for garden owners; we simply do our best to turn their gardens into special places where moments are inspiring and different, just like people. The more varied our garden is the more joy it brings us.

Timeless garden wood

We have used wood to build our houses and gardens since ancient times and it has accompanied us throughout the centuries of our development. Every piece of wood has its own character and soul. Wood is warm and beautiful and we understand its life cycle. Like us, trees move in a circle of life, growing and living in the

time given to them. The constantly repeating cycle makes wood a renewable resource and using resources responsibly is increasingly more important in the context of growing environmental problems. Wood produced through correct and fair management is undoubtedly one of the best choices of our time. Wood is timeless – ancient and familiar on the one hand, and a building material with a clear future on the other.

New this year

Everyone needs to have a special place, a place to escape to from everyday worries. Finding yourself in a garden gives you many opportunities to recover your thoughts and rest from the day. Refreshing your garden gives both you and the garden a new impulse to start the day. Our product development team has been working hard during the last years and has many new products to share with you.

To find new products quickly, just follow the sign „NEW!“ in brown squares next to the product and yellow circles in the index and check the product overview pages before every product category.

The Gable roof cabins range has been widened by the addition of the beautiful **Catherine 14,5 m²**, which is similar to our other Caroline cabins but with a gable roof. The Catherine also has a movable window with louvre panels which help to gain some privacy or offer shade from the scorching sun.

To meet the market demand for having more houses with large glass surfaces, we have created a **Heidi 22,5 m²** with large and long windows to let the natural light into the house and have a great view to your garden from inside out. The room layout of this Heidi easily lends itself to use also as a sauna house.

Our Emilia glasshouses receive great feedback from customers. We decided to surprise you with another and even bigger one – **Emilia 19,1 m²**. The T-shaped ground plan makes the glasshouse very spacious so you can use it as a leisure room, grow vegetables and flowers in it or offer meals to your family and friends.

Let us introduce you to our brand new product concept **Palmako Connect**. This concept lets you to combine different items which result in endless simple or complex product set your garden needs. We have put together various sets with the internal

area of **8,3 m²**, **16,6 m²** and **24,9 m²** for you to see a small part of all the possibilities to combine. All Bianca wooden items and sets are available in three dip treatments. Please browse the pages 156-181 to get familiar with Palmako Connect Bianca product series and get inspiration to combine your own set according to your needs.

The Shed section has got now a flat-roofed shed **Stig 8,2 m²** where you can keep your garden tools, bikes or any other things that need to be stored. It has been a while since we last upgraded the kiosks – meet the **Kira 7,7 m²**, compared to other kiosks Kira has a flat roof and looks in appearance a more modern type of kiosk.

The value of having SPA possibilities in your own garden is constantly growing on the market and the products related to SPA are more and more in demand. In a new Garden Spa category you will find the **Anita 1,3+0,7 m²** barrel sauna and **Anette 3,0+1,5 m²** oval sauna with black shingles included. We have added the electric heaters into our optional products choice for you to choose the one that suits you the best.

Looking at the Fence category, a panel family with horizontal 28 mm slats called **Line** with frame profile 32x40 mm is available as white painted and grey pressure-treated.

Just as importantly, among the Furniture category we have created a brown pressure-treated bench **Camille 16**, which can be used for sitting bench in the garden as well as an extra bench for guests next to the dinner table.

We truly hope that you have now an overview of this years' new products and have enough ideas and motivation to rethink the plans for your garden in the future.

Palmako is a part of the Lemeks Group

Lemeks AS was founded in 1993 with an aim of creating a modern forest stocking company systematically covering the whole country and on the basis of which a timber industry could be established that values local timber.

Today the Lemeks Group has developed into the biggest forestry company in Estonia that is funded by Estonian capital and operates successfully in the sphere of timber processing and forest stocking as well as in agriculture.

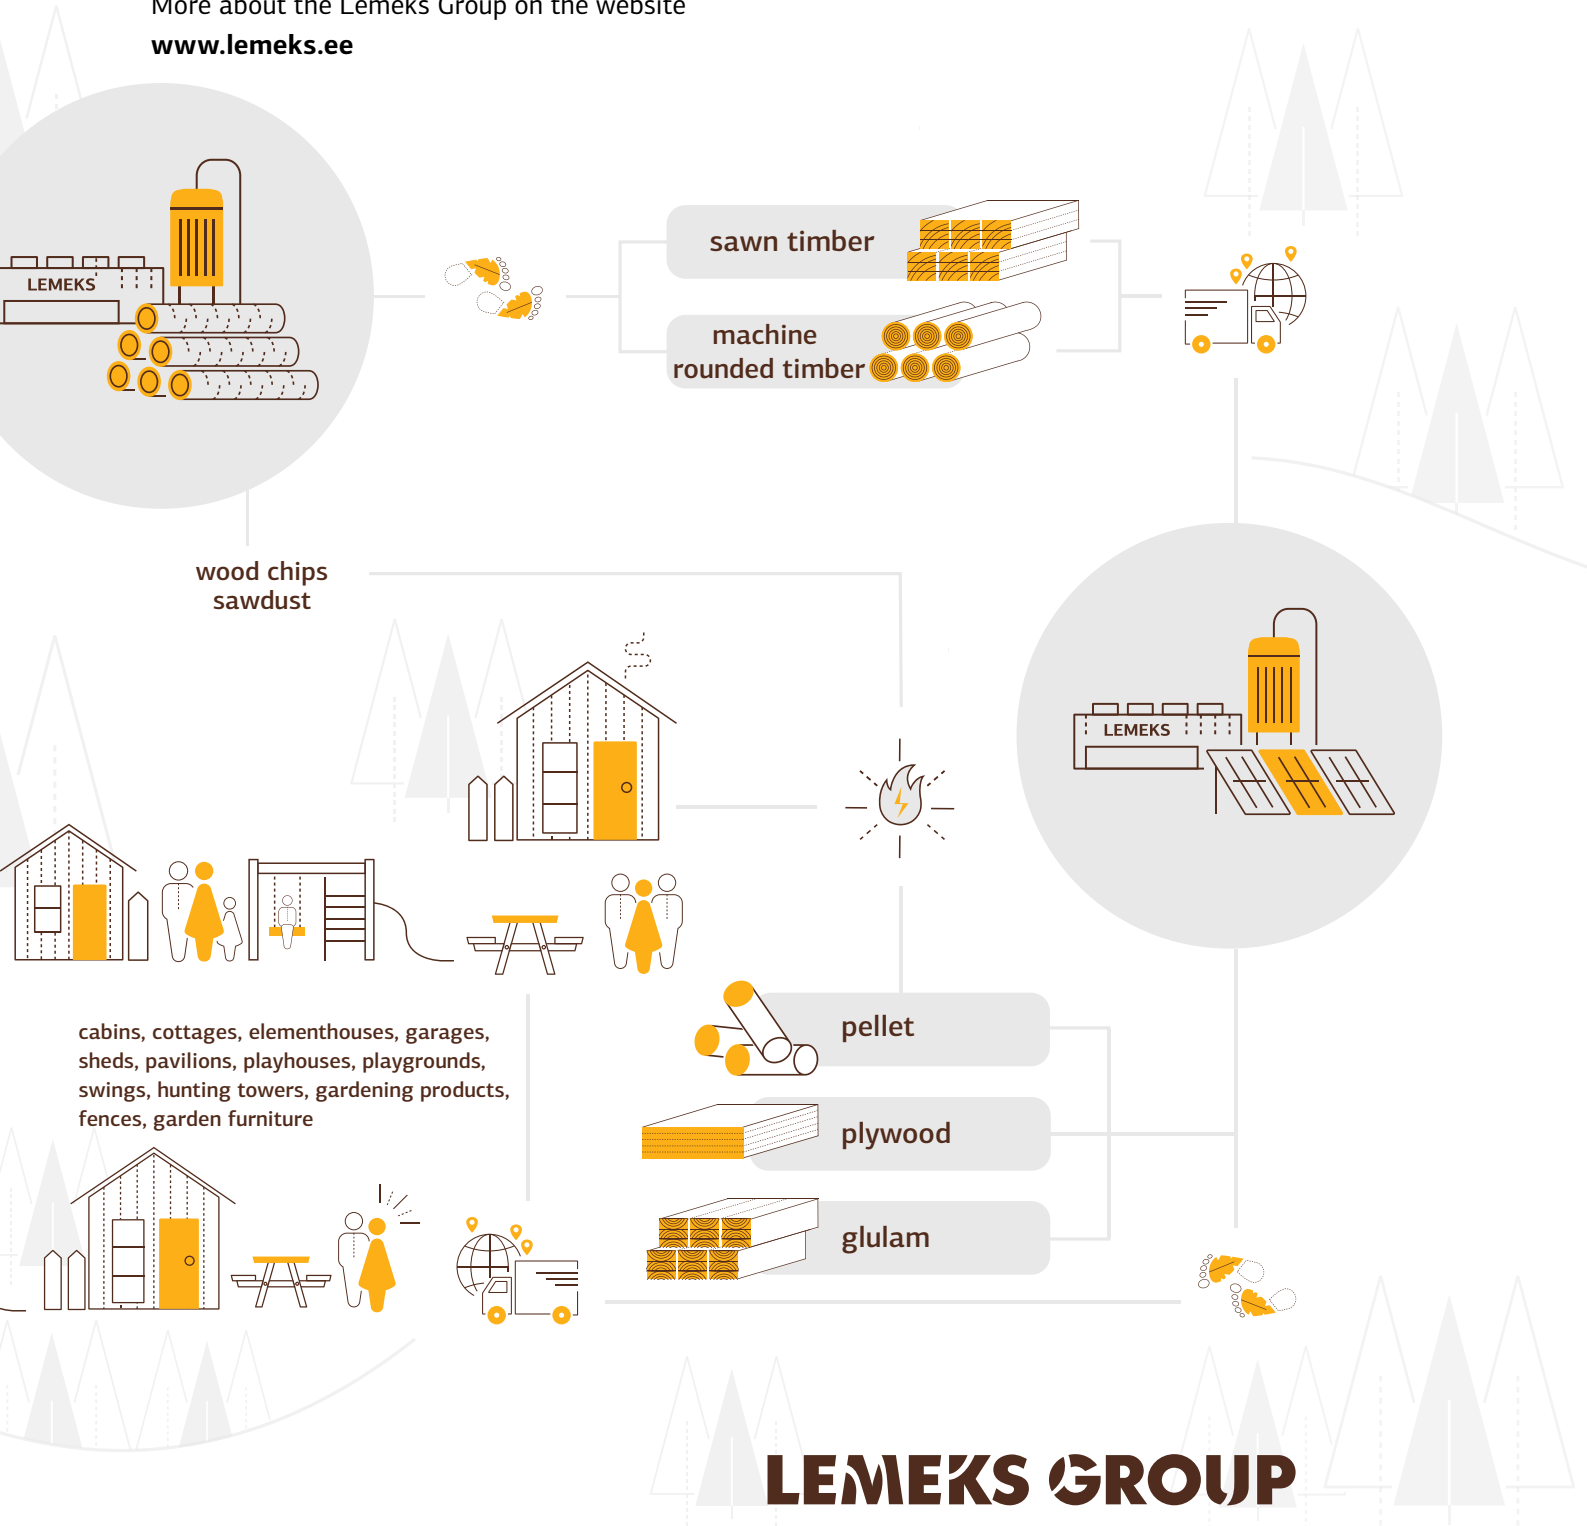

Timber value-added chain

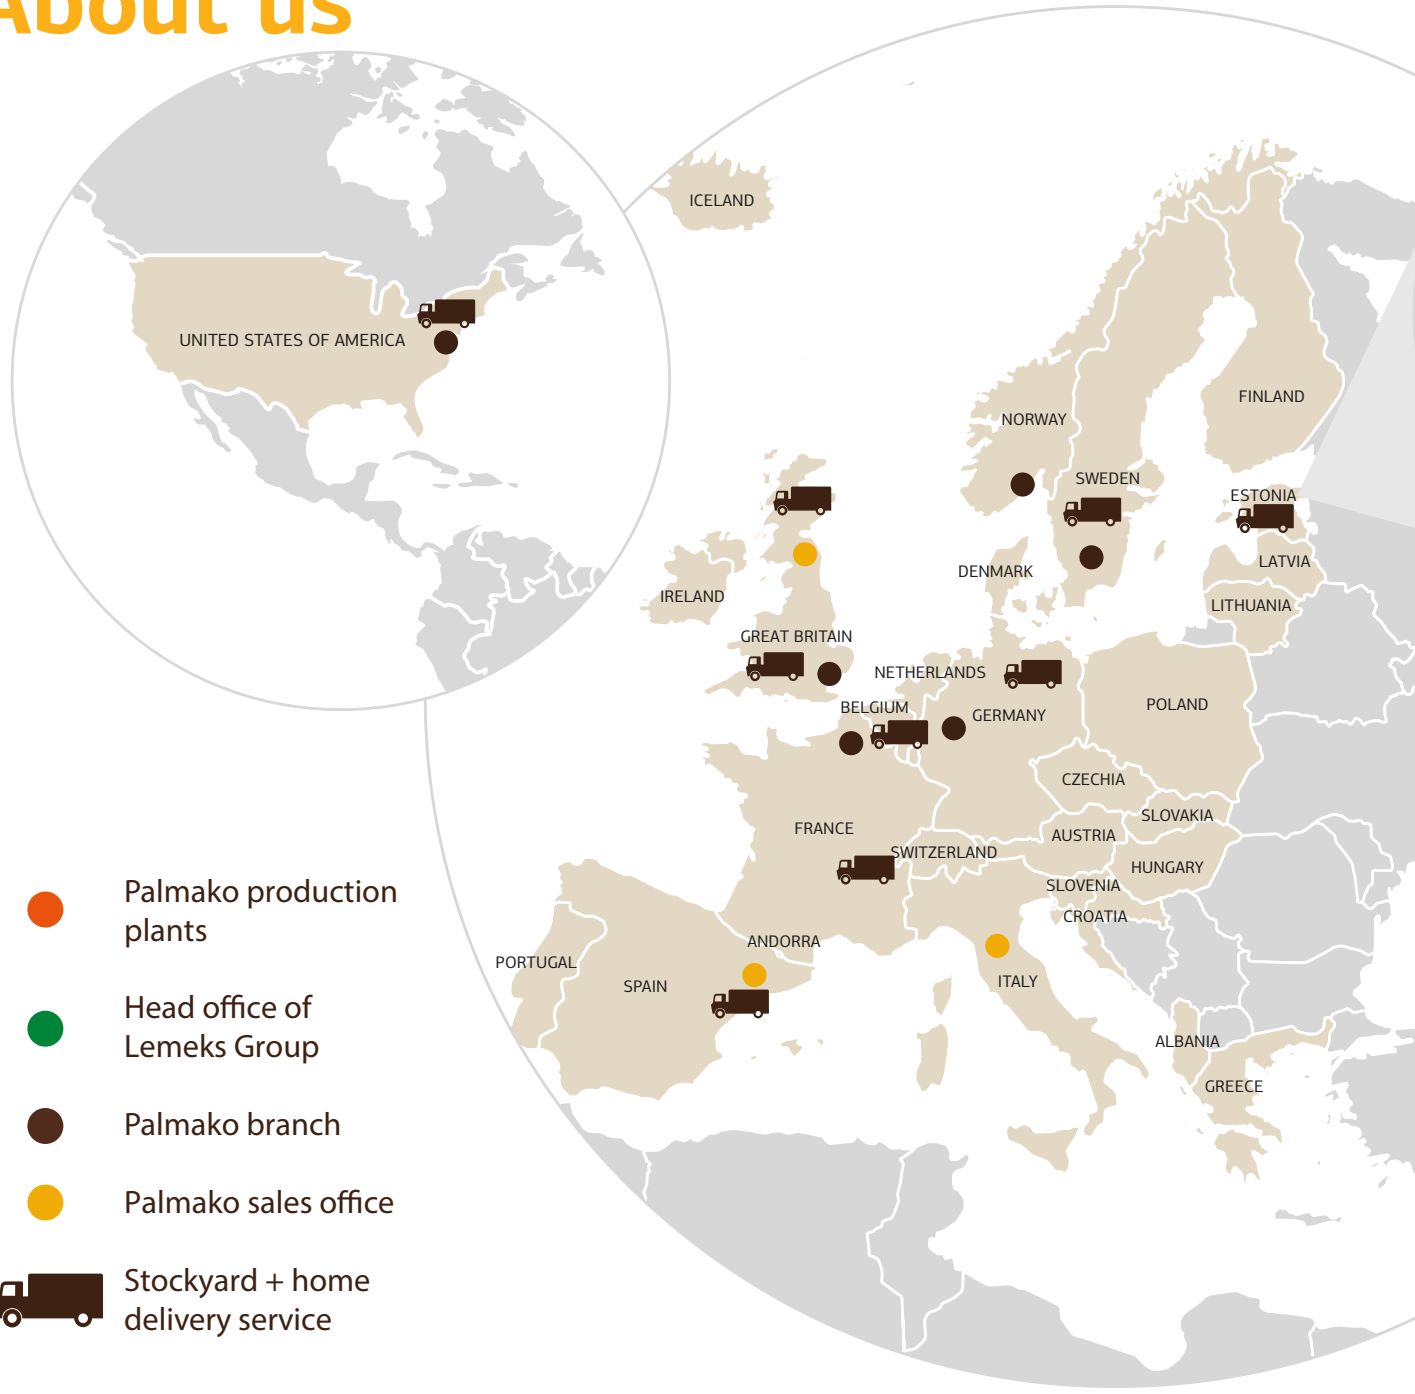

35 subsidiaries and related companies provide employment to more than 1000 people in Estonia, Latvia, Germany, Sweden, Norway, France, Spain, United Kingdom and the United States of America. Belonging to the Lemeks Group provides Palmako support in financial management and IT. It also gives an excellent opportunity to share valuable information and experience with other specialists in the same field. The existence of belonging to the group's value chain ensures the supply of raw material even during harder times.

More about the Lemeks Group on the website

www.lemeks.ee

About us

- Palmako production plants
- Head office of Lemeks Group
- Palmako branch
- Palmako sales office
- Stockyard + home delivery service

Principles that we follow in our everyday work:

- We are honest
- We are goal-oriented
- We are open to changes
- We are willing to take responsibility
- We respect our partners
- We assess our colleagues by their results, not by their words
- We share our knowledge and skills with each other
- We aim to do, rather than impress

We have invested over 50 million euros in modern, professional technology, which has enabled us to use the best machinery to make our products.

Leading manufacturer in Europe

Palmako produces and exports over 60,000 wooden houses per year, and 25 years of active operation have given us significant experience to become Northern Europe's leading manufacturer and distributor of square log garden houses.

Scan this QR-code to see a video how our products are made with utmost care!

Social responsibility

Although wood is a sustainable and regenerative natural resource, forestry requires careful and responsible management. An uncaring and irresponsible attitude towards forestry management will inevitably harm our environment significantly. We all have heard stories about the loss of some rainforests, but this concern applies equally to our Nordic forests as well. Palmako is FSC® certified, ensuring that we use wood from responsibly managed forests. We care about the environment, which we share and in which we all live. We really do.

5-year warranty

Over the last 25 years we have produced over half a million wooden houses. We use only the latest technology to make no compromises on quality, and to make sure that the nature and its resources are handled in the best possible way. We really care about the environment that we all share. We hope that already offers a reason to trust us, but we also place a 5-year warranty on our buildings if processing them with wood preservatives and paint as recommended. Playgrounds and swings have 2-year warranty for your complete peace of mind.

Excellent customer service

We keep stock of our re-sellers to ensure fast, precise deliveries throughout Europe, and we are ready to deliver our products directly to the end customer's backyard if required. As a multilingual company, we can service our customers in 8 different languages – English, German, French, Spanish, Finnish, Swedish and Norwegian as well as Estonian.

Nordic spruce

Wood is an impressive, warm and living material. And nothing compares to the wonderful aroma of fresh timber. During the long, cold winters the trees grow slowly, which makes their timber especially thick and durable. You can feel it in all our products - comfortable garden and log houses, pavilions, carports, tool sheds, children's play houses, weekend and living houses, glue-laminated products, and wood pellets.

In addition to log cabins, Palmako manufactures wide selection of garden products, glulam products and heating pellets.

Estonia is regarded as the biggest wooden house exporter in the Europe. Palmako plays a significant part in this. Our products are found in more than 30 countries around the world.

Look for FSC® certified products.

Structure of products' pages

FUNCTION

All our products are organised into separate classes according to their function and each class begins with an overview of all the items that it includes.

Cabins:
outbuilding and leisure

Pavilions:
Outdoor leisure

Fences:
Fence panels

TYOLOGY

Products of the same type and purpose carry the same name.

In each class products have been assembled into smaller families according to their design.

Families are made up of products that carry similar external characteristics, like type of roof, door and window type and placement, terrace and overhang of the front roof.

Gable roof

Flat roof

Pent roof

Helena cabin family

Irene cabin family

Lotta cabin family

SIZE

Under each family the products are presented in the order of ascending surface area with increasing wall thickness and in some cases improvement of the quality of doors and windows.

Optional products

At the end of each product class we have presented a table showing additional opportunities to personalise and style your chosen product, like canopy roof, extension, different roof covering materials, rain gutters, additional doors and

windows and their types, etc. A more detailed list with pictures can be found at the end of the catalogue, under the Palmako Optional Products category.

Sally 15,5 m² basic model

BEFORE

Sally 15,5 m² with optional products

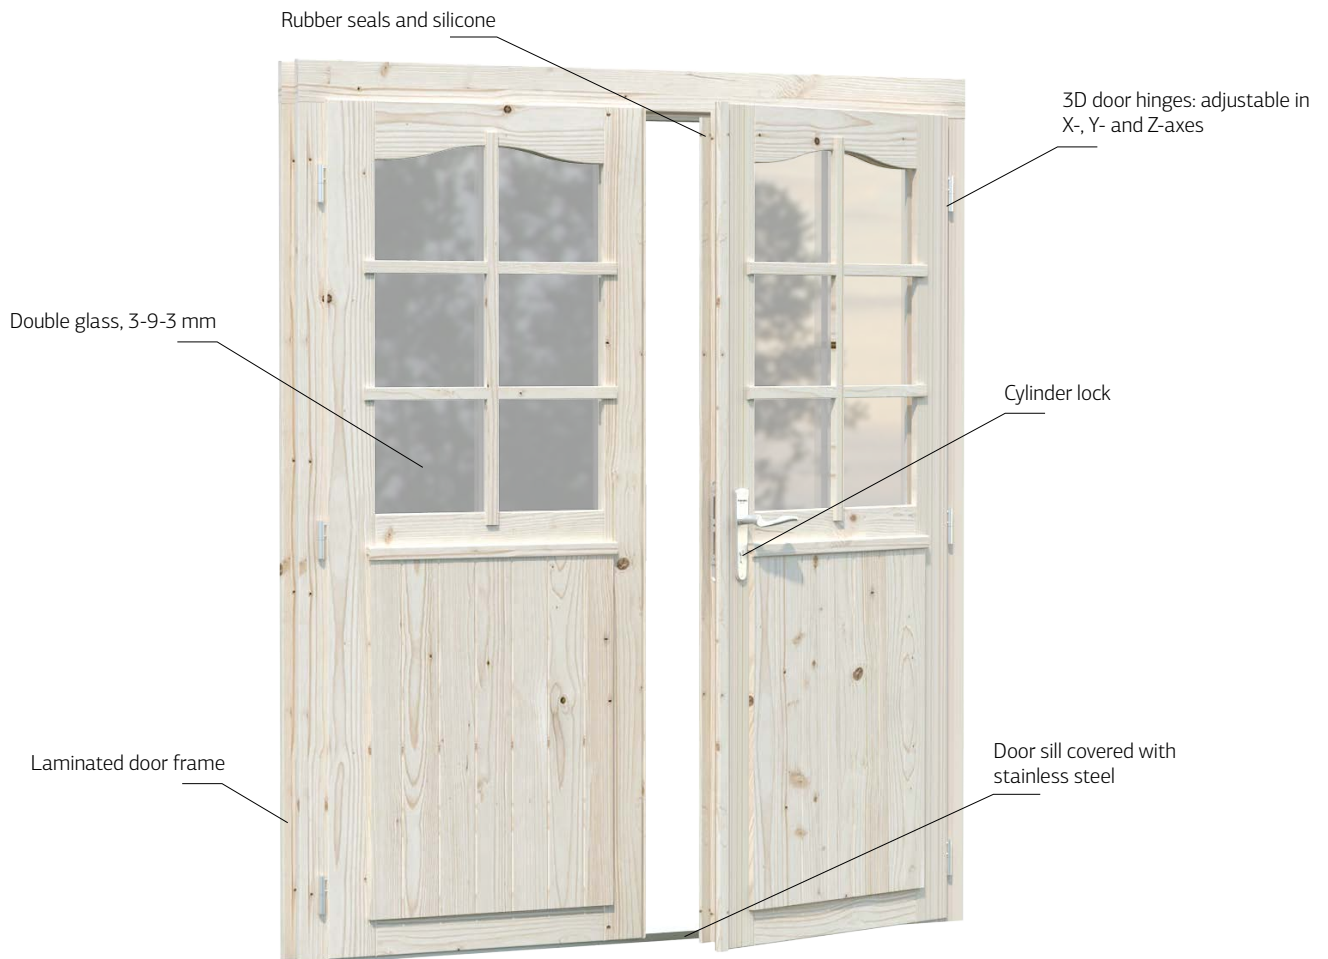

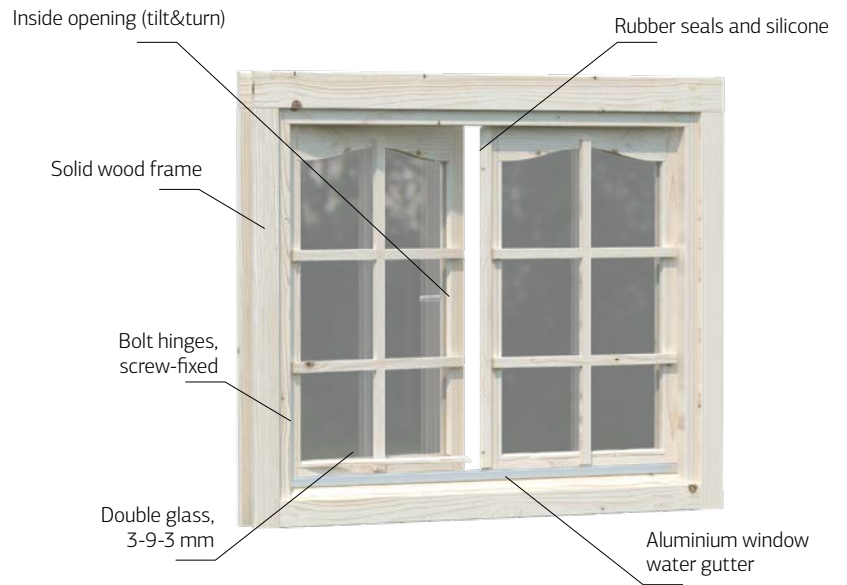

AFTER

Palmako doors and windows

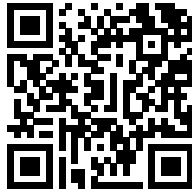

We have many doors and windows in our product range. When you read the model descriptions next to our products you will probably notice that by door and window type we use certain words like Garden, Garden+ or Summer. These words represent agreements of what is inherent to a particular door and window type. Of course there can be exceptions depending on a model, but overall after getting familiar with the following table on the next page you will have an overview of our doors and windows.

For example the door and window type of our classical cabin Helena 15,1 m² is Summer. Please see the drawings of the door and window with the features characteristic to Summer door and window type:

Scan this QR-code to see the door and window types table on our homepage! Likewise on the webpage the same table is shown on the next catalogue page.

Scan the QR-codes to see the videos of specific door and window types:

	Shed	Eco	Garden	Garden+	Summer	Living ¹
Suitable for walls	12-44 mm	16-44 mm	28-70 mm	40-70 mm	40-70 mm	70-134 mm

WE PRODUCE COTTAGES OF YOUR DREAMS

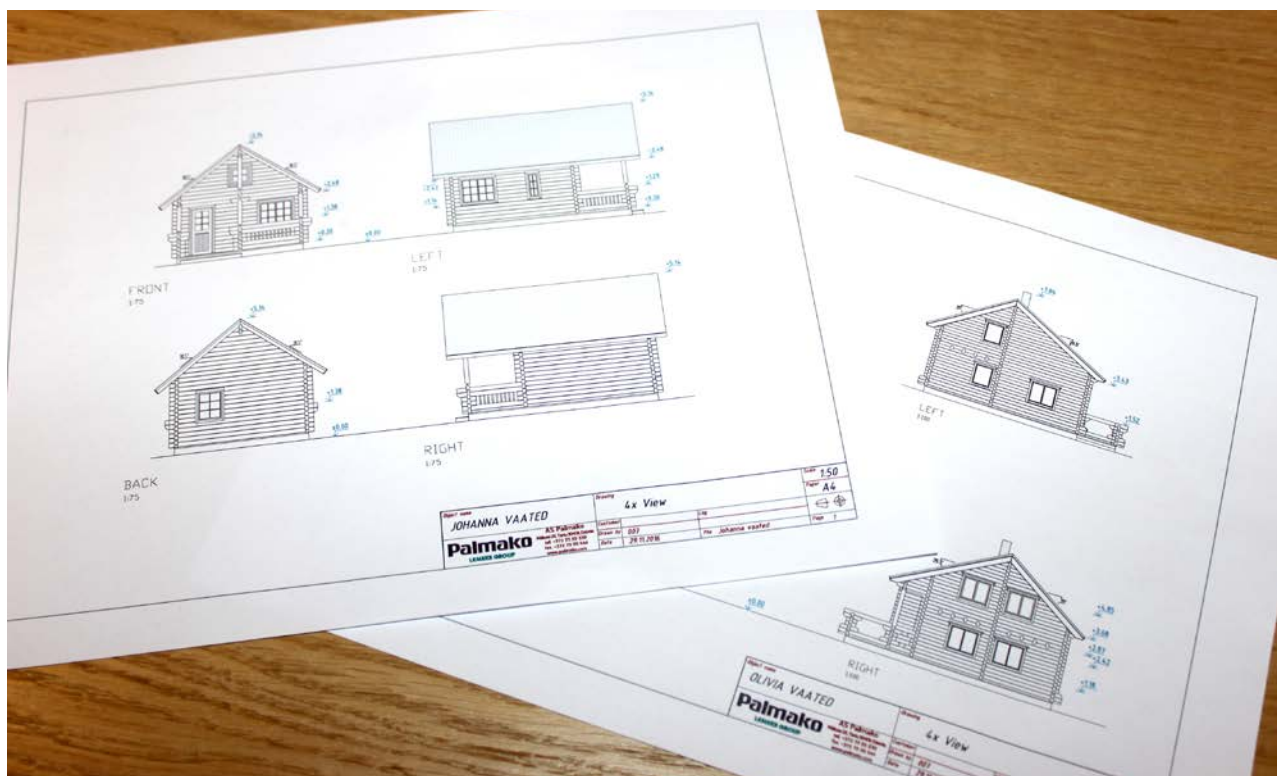

We offer houses with wall thicknesses of 44 mm and 70 mm solid timber, as well as 88 mm, 114 mm and 134 mm laminated timber.

This catalogue includes only some of the models and ideas available for weekend houses – with the help of our architects and bespoke design service we are also able to offer buildings made to your own specific design and requirements.

The 4-side views and ground plans will be supplied when necessary for acquiring a building permit. We can offer you the complete set of wooden details needed for the construction of the house like doors-windows, stairs, cladding for the walls etc. With every house we supply detailed specifications and blueprints for installing the house. All parts have been marked to simplify construction. Please ask for further details.

Individual modifications for all these cottage models in this catalogue are possible! We can also offer these houses with premium quality doors and windows (starting from 70 mm log thickness).

We hope you will take contact with us if you have a dream cottage vision in your head. Together we will definitely find the best solution bringing it to reality.

MODERN LOOK

GRACE FAMILY BY PALMAKO

Palmako's new Modern Look Grace family houses are born from constant unrest to create something new and exciting.

These cabins are extraordinary due to the innovative solution for wall construction – special profile of glue laminated timber wall panels. Glue laminated timber is stable and durable base material, that is also wonderfully easy to set up.

The creation of such products is possible, since Palmako's investment into the new fully automatic production line of laminated timber.

Glue laminated wood ensures, that the building does not sink after completing. Unlike conventional laminated timber houses, new wall panel profile is unique - it is thin and high and the tenon joints stay tighter by being covered with a slat.

To reach the full height of the house, only 4 panels on top of each other are needed. When the lifting height of an ordinary milling beam is 114 mm, the new wall panel has a lifting height of 518 mm, which means that the surface of the wall remains smoother. Laminated timber is stable (no expansion-contraction or distortion), has a beautiful structure (no fissures or defects) and has a good fire resistance and heat insulation.

New innovative garden house family has four beautiful sisters: Grace 8.1+4.1 m², Grace 8.1+8.1 m², Grace 12.4+4.1 m² and Grace 14.5 m², which differ only in size and purpose. Why not create a cozy home office in a small cabin with a shorter canopy roof or use the Grace with a longer shed as a sauna or pool house. Grace 12.4+4.1 m² with two rooms is perfect for accommodate friends or relatives. The largest Grace has probably most functions among all sisters.

All Modern Look garden houses use innovative glue laminated wall panels. Lifting height of 518 mm makes an installation of the house easy and fast.

Modern wall corner connection of glue laminated wall panels is fixed with dowels and secured by screws.

Stable and weatherproof corner and log connections are guaranteed by using self-adhesive sealing.

Premium quality windows and door

The quality of Grace houses doors and windows is the best in its class. Laminated timber door frames, high quality classy oak-aluminium combined door sill, double toughened glass and premium lock system. Windows are with one-hand tilt-and-turn system with double toughened glass.

Foundation joists and floor boards

Foundation joists of the Grace houses are treated to guarantee long lifetime to the basis of the house. Solid 28 mm floor boards and floor slats are included in the house kit.

Roof construction

Strong glue laminated rafters carry 19 mm roof boards. To ensure water resistance of roof, we strongly recommend to use solid EPDM roof covering for these pent roof house models.

Paint finishing options

The doors/windows can be delivered from the factory with paint finishing, and the colour shade can be chosen from RAL colour chart. The most popular colour tones are:

RAL 1001

RAL 3009

RAL 6006

RAL 7016

RAL 9005

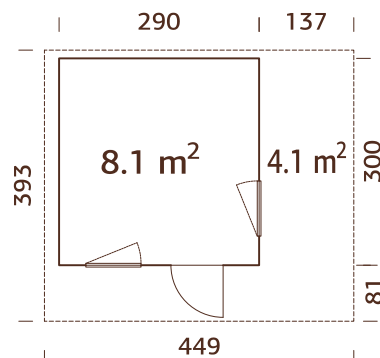

RAL 9010

NB! Colours as shown in the catalogue may vary from the actual colours.

1 h

Placing door and windows
Double glazed windows ensure good thermal resistance. All windows can be opened.

6–8 hours

WE HAVE A GREAT ALTERNATIVE TO THE TRADITIONAL GARDEN HOUSE!

These contemporary-style buildings with a Scandinavian look and quality are most suitable for a city garden. Palmako Nordic Houses represent our most modern and innovative pre-fabricated house models.

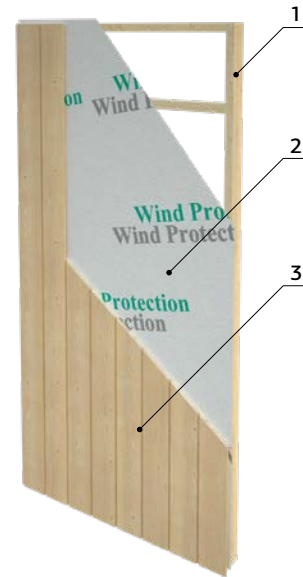

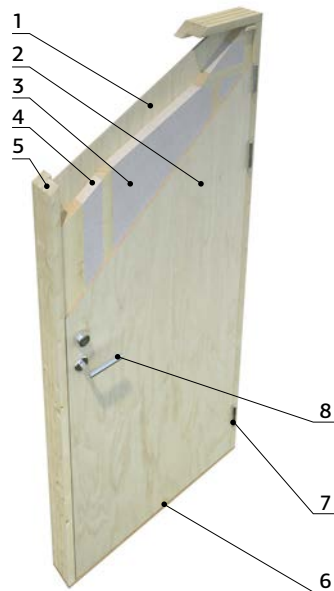

Ready-made wall elements are covered with wind-protection plastic inside, making these houses extremely weatherproof, especially rain and wind resistant. 70 mm frame construction is perfect for hiding cabling (wires, pipes, etc) as well as for the same thickness of insulation. All the houses have double thermo glazing and outwards-opening windows.

These models have 40 mm EPS (Expanded polystyrene) insulated doors, which makes them especially rain and wind resistant.

Total element thickness by Nordic houses is 88 mm. Here is a cross section of an element just to get better understanding of what these elements look like and consist of:

1. Plywood 10mm
2. Plywood 10mm
3. EPS 50 40mm insulation
4. Wooden skeleton 40x40mm
5. Wooden laminated frame 44x105mm
6. Hardwood 28x93mm threshold
7. Hinge 115x84x3mm (3x)
8. 565 lock and lock box

1. 34x70mm frame
2. Wind-protection plastic
3. 18mm fine sawn cladding

PRE-FABRICATED PALMAKO NORDIC+ HOUSES WITH ELEMENT THICKNESS OF 160 MM

These Scandinavian-style houses are suitable for any garden that lacks strong, weather-resistant buildings where you can be with your family and friends. Feel free to take your time and delve into the following pages of our best choice of modern, pre-fabricated Nordic+ houses.

Ready-made wall elements are covered with wind-protection plastic inside, making these houses extremely weatherproof, especially rain and wind-resistant. It is comfortable to be in a building when it is warm - we have thought about it and given you an opportunity for 95 mm insulation. You can insulate walls, floors and ceilings. For better house ventilation we have added ventilation battens under the cladding. All the houses have double thermo glazing and outwards-opening windows. These models have 40 mm EPS (expanded polystyrene) insulated doors.

Total element thickness of Nordic+ houses is 160 mm. Here is a cross section of an element just to get a better understanding of what these elements look like and consist of:

1. 44x95mm frame
2. Wind-protection plastic
3. 19x45mm ventilation battens
4. 28x70mm cladding support battens
5. 18mm fine sawn cladding

One set – many houses!

A model contains set of wall and window-door elements, which can be rearranged in several ways. This results in multiple appearance options for the house.

GARDEN SPA

OUTDOOR SPA IN YOUR OWN GARDEN

We are so excited to introduce you our brand new Garden Spa category, a new level in our product development with products that have been missing so far among our selection. What could be more enjoyable than having an outdoor spa in your own garden, a relaxing area and a healthy extra space for yourself, your family and friends. With having a sauna in the garden you can easily transform your garden or property into a personal functional garden SPA. We have in Garden Spa product range two beautiful saunas – a barrel sauna Anita 1,3+0,7 m² and an oval sauna Anette 3,0+1,5 m². Electric heater can be ordered as an optional extra, there are HUUM Drop and Narvi NM heaters in our selection, please see the pages 154–155 for more information.

The shape of barrel and oval saunas provide a **good air circulation**, the heat distribution is very even because after hot air rises in the steam room it gently curls down each side of the sauna. Cool air is pulled in the low vent by the vacuum created by hot air rising, which then exhausts out the high vent on the opposite side of the room.

Steam room **benches with back** take the pressure off from low back, shoulders and neck and help to ensure the spine in a neutral position. These benches are made of **aspen** which has low thermal conductivity and does not release resin.

The **two-level benches** (in Anette 3,0+1,5 m²) allow each person to choose the optimal temperature regime.

Removable **28 mm wooden floor grates** can be easily cleaned, do not let to slip and feel really good under feet.

Front room (in Anette 3,0+1,5 m²) can be used for many different purposes – you can either wash yourself or store the things there, change the clothes, take a short break or sometimes just hide from a bad weather.

Black shingles are included in the set. Shingles protect your sauna from the top and give the final touch in appearance. Anette 3,0+1,5 m² set includes additionally also the roofing felt (underlayer).

Both saunas have **high quality doors and window**. The glass door of the steam room has a 8 mm toughened glass, meanwhile the partly glazed outside door has a 4-6-4 mm double toughened glass. The window has a 3-6-3 mm double glass. **Window in the steam room** (in Anette 3,0+1,5 m²) lets natural light inside the room and gives chance to look outside while taking bath procedures.

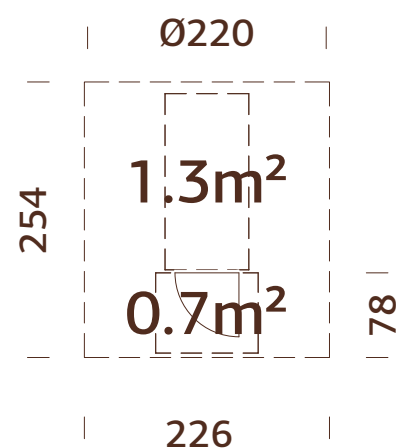

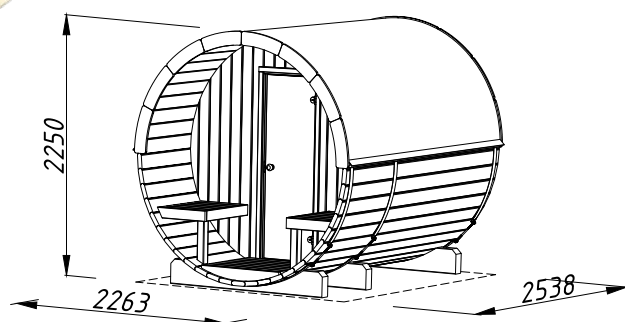

The cozy benches outside offer a nice place where to take a short break, breathe the fresh air or enjoy some refreshments.

A HEATER IS THE HEART OF YOUR SAUNA

A heater is like the heart of a sauna, without the heater there will be undoubtedly no joy of being in a sauna. Although both wood-burning and electric heaters have their advantages and drawbacks, eventually, the choice of the heater is a matter of personal preference. Our saunas are developed for heating with electric heaters, which we offer as optional products. Electric heaters heat up the sauna fast, allow the users to have control over the temperature and change it easily. Please keep in mind to use a licensed electrician to complete the installation of an electric heater.

There are two heaters in our selection – HUUM Drop and Narvi NM, both 6 kW. Please get familiar with the descriptions and specifications so you can make the right decision for choosing the one for your sauna. For further information please ask from the salesteam.

HUUM Drop electrical heater 6 kW

Stainless steel
5-year warranty
Measures: 590 x 390 x 335 mm (height x width x depth)
Safety distance: sides and front 120 mm

The set includes

- electric sauna heater
- sauna stones (four boxes, 60 kg)
- built-in electronic control (UKU Local controller)
- wall mount
- 5+5 m cable for temperature and door sensor
- 3 m cable for main module and user interface
- Screws for fastening the user interface and temperature sensor

Power

Fuse	3 x 10 A
Supply voltage 3-phase	400 V 3N
Cable	5 x 1,5 (N x mm ²)

In the case of a 230 1N connection, an analogous connection is made to the 3-phase. The heating circuits must be done before the circuit breaker.

UKU Local controller

Temperatures: 40-110°C
Supply voltage: 400 V 3N; 230 V 1N
Heating period: 3h, 8h, 12h
Connectable to lights/ventilation and steamer
Temperature sensor and overheating protection
Door sensor
Child safety lock
Timer

The set includes

Control console (105 x 55 x 22 mm)
Control console cable (3 m; 4 x 0,34 mm²)
Main module (142 x 90 x 58 mm)
Temperature sensor
Door sensor
Temperature/door sensor cable (5 + 5m; 2 x 0,22 mm²)

Narvi NM electrical heater 6 kW

Black painted, stainless steel

2-year warranty

Measures: 580 x 430 x 300 mm (height x width x depth)

Safety distance: sides 50 mm, front 80 mm, up 1150 mm, floor 120 mm

The set includes

- electric sauna heater
- sauna stones (two boxes, 40 kg)
- installation brackets and connection wiring

Power

Fuse	3 x 10 A
Supply voltage 3-phase	400 V 3N
Cable	5 x 1,5 (N x mm ²)

In the case of a 230 1N connection, an analogous connection is made to the 3-phase. The heating circuits must be done before the circuit breaker.

PALMAKO CONNECT – NEW PRODUCT CONCEPT WITH ENDLESS VARIATIONS

People have various needs and visions of how their garden should look like and which products help them feel joyful in it. We have a brand new product concept that helps to fulfill these needs. We have created a Palmako Connect product series with many possibilities to please every single person who won't find a product among our selection and has a strong vision in his or her head of what the wished product should be.

One can combine with our main products – Bianca 8,3 m², Bianca 16,6 m² and Bianca 24,9 m² – different items which result in endless product sets. All you have to do is pick out the items you would like to combine, assemble them together and enjoy the result!

If you do not want to combine the product yourself then let us help you – we have put together various sets with the internal area of **8,3 m²**, **16,6 m²** and **24,9 m²** to show you that the possibilities of creating as well as simple and complex sets is really easy. All you need to think of is what are the functions of the building you are going to create for yourself and choose the needed items.

Main products – pick one out and combine it with other items!

ADDITIONAL DOORS AND WINDOWS

As you are now familiar with the different items that can be used for combining a Palmako Connect product of your own, hopefully you also noticed that one of the optional products is a wide selection of doors and windows. The wall thickness of Palmako Connect products is 28 mm, so are the thicknesses of the suitable doors and windows.

When choosing an extra door or window please think about the function of the building you are creating - where do you want the entrances to be, which corners should be more dark or vice versa be very lightful thanks to the window that lets lightness in the building. There are no restrictions for your fantasies, you can modify a wall with a window or door even if it is not a closed room or area. Just follow your dreams and build yourself a Bianca that you need!

Please get familiar with the following 28 mm doors and windows suitable for Bianca. The article number under every picture is given as natural wood (NO treatment), regarding the article numbers of our DIP treatments please consult with the sales team.

All the 28 mm doors and windows for Bianca are made of the finest Nordic fir. Majority of them have a 4 mm single glass or 4 mm toughened single glass, except for a one door with a 4-6-4 mm double toughened glass and one window with a 3-6-3 mm double glass. Laminated door frame, door sill covered with stainless steel, cylinder lock and regular bolt hinges are the keywords characteristic to these doors. We provide windows with window frame out of solid wood, wooden water gutter, regular bolt hinges and outside or inside opening. We are sure that you will find suitable doors and windows for your Bianca among our selection!

COMBINE YOURSELF A PALMAKO CONNECT PRODUCT YOUR GARDEN NEEDS

If you did not find a suitable Palmako Connect Set for your garden, do not worry, our concept has been built up in a way that all products can be combined with each other. That means the set building opportunities do not end with our proposed sets but have wide and endless combinations. In that spirit we have created a helping tool for you to understand and discover what suits best for you. So just grab a pen and get familiar with the table below. Maybe this is a tangible start of refreshing your garden with a unique and functional product that has been missing so far in your life!

After you are familiar now with the different Palmako Connect possibilities, you can start to build a Palmako Connect product of your own. Here is a small table for you just to start from by completing the product of your own. By any questions please feel free to ask from our sales team.

Main products	Art. No.*	Pcs
Square roof	109392	
L-type roof	109381

PRE-FABRICATED PALMAKO NORDIC+ GARAGES WITH ELEMENT THICKNESS OF 160 MM

These Scandinavian-style garages are suitable for any garden that lacks strong, weather-resistant buildings where you can be with your family and friends. Feel free to take your time and delve into the following pages of our best choice of modern, pre-fabricated Nordic+ garages.

Ready-made wall elements are covered with wind-protection plastic inside, making these garages extremely weatherproof, especially rain and wind-resistant. It is comfortable to be in a building when it is warm - we have thought about it and given you an opportunity for 95 mm insulation. You can insulate walls, floors and ceilings. For better ventilation we have added ventilation battens after cladding. All the garages have double thermo glazing and outwards-opening windows. These models have 40 mm EPS (expanded polystyrene) insulated doors.

Total element thickness by Nordic+ garages is 160 mm. Here is a cross section of an element just to get a better understanding of what these elements look like and consist of:

1. 44x95mm frame
2. Wind-protection plastic
3. 19x45mm ventilation battens
4. 28x70mm cladding support battens
5. 18mm fine sawn cladding

One set – many houses!

A model contains set of wall and window-door elements, which can be rearranged in several ways. This results in multiple appearance options for the house.

THE DOOR QUALITY OF MARTIN, OLAF AND KALLE SHEDS

Contemporary-style buildings including Martin, Olaf and Kalle sheds have ready-made wall elements that are covered inside with wind and moisture protection plastic, making these houses extremely weatherproof. A model contains a set of wall and window-door elements which can be rearranged in several ways. Simple construction allows for fast and easy assembly.

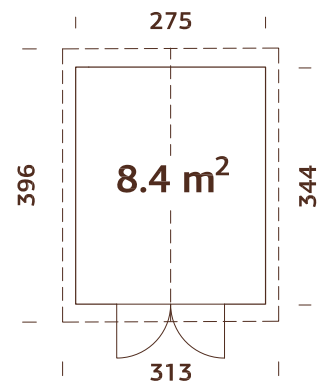

These models also have 32 mm EPS (expanded polystyrene) insulated doors, which make them especially rain and wind resistant. Please study the drawing.

1. HDF 3mm
2. EPS 50 32mm insulation
3. Wooden cladding 12x114mm
4. Wooden skeleton 32x40mm
5. Wooden laminated frame 44x90mm
6. Hardwood 28x78mm threshold
7. Metal kick plate 0,5mm covered with black pural matt coating
8. Hinge 115x84x3mm (3x)
9. 2018 lock and lock box

CREATE YOUR OWN GARDEN STORY WITH PALMAKO FENCE PANELS

If your garden misses elegant and airy fence panels, be ready to meet our Fence panels selection. Surrounding your city garden or terrace with fence panels is so easy and refreshing way to give your favourite place to be a unique and modern look.

We have ten different designs within our fence panels collection so you can pick your favourite or why not to combine different designs according your needs. All our fence panels have 33x57 mm or 32x40 mm frame which makes them easily manageable and show your garden has been nicely taken care of.

Please get familiar with designs as follows:

Line

Horizontal with gaps.

Nina

Horizontal with gaps.

Nora

Vertical with rail in the middle.

Reena

Vertical with rail in the middle. Horizontal trellis.

Elke

Vertical with rail in the middle. Vertical trellis.

Helis

Horizontal with gaps and two vertical rails. Vertical trellis with one cross.

Marit

Horizontal with gaps and two vertical rails. Vertical trellis with three crosses.

Karina

Vertical with rail in the middle. Vertical trellis with three crosses.

Janet

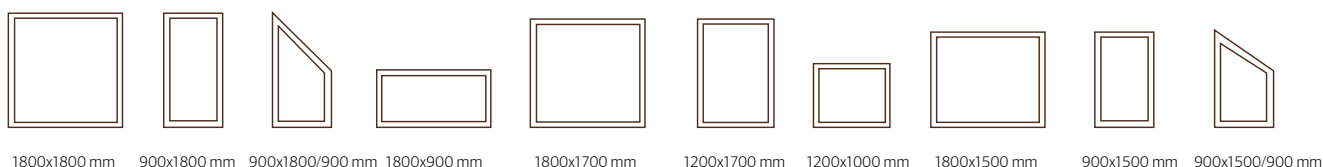

Vertical boards with 6 mm bright toughened glass.

Birgit

6 mm bright toughened glass in a solid wood frame.

Depending on model, one can choose between ten dimensions:

And depending on model one can choose between different treatments which suits the best into the garden interior:

grey pressure-treated

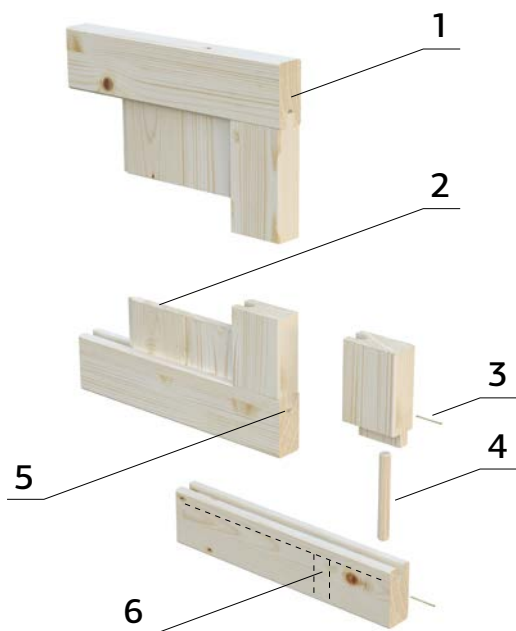

green pressure-treated

primer+white painted 2 layers (RAL 9016)

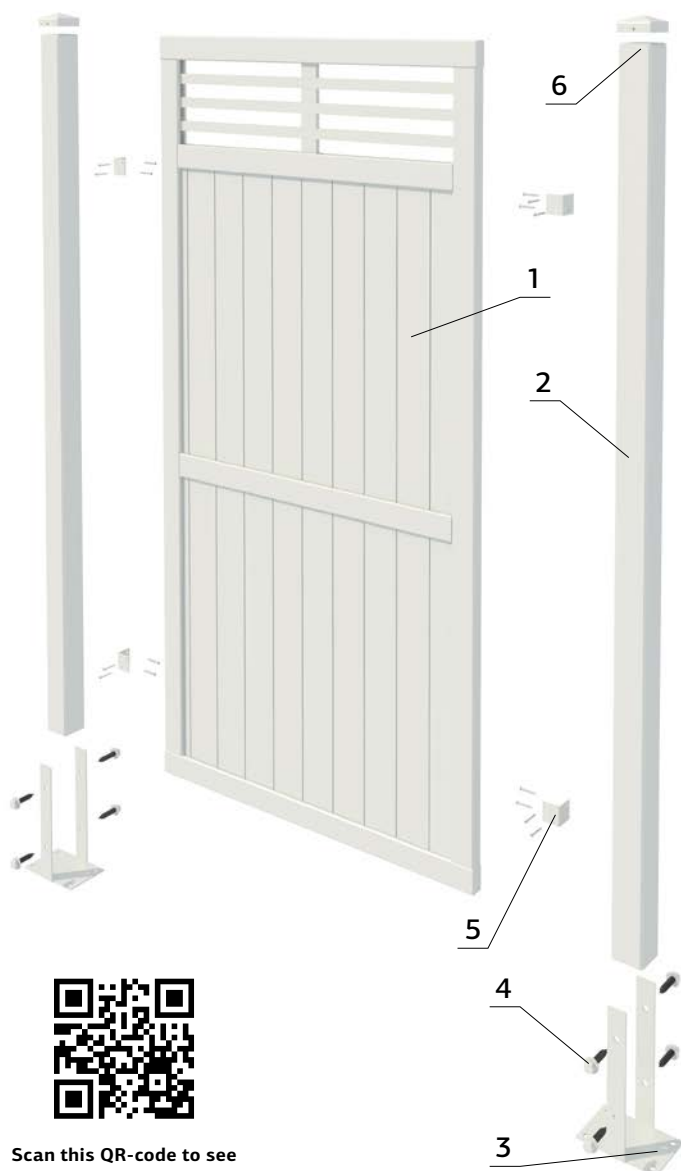

primer+grey painted 2 layers (RAL7016)

1. Frame profile 33x57 mm
2. Board profile 12x95 mm
3. Brad nails
4. Dowel 10x130 mm
5. Water channel
6. Drainage hole to let out any built up moisture or water

All our fence panels can be easily assembled. If you look at the visual of assembling a fence panel below, you will see which products you need and how to assemble them together.

See Optional Products on p. 247 for details.

1. Fence panel
2. Post
3. Post leg
4. Screws
5. L-type fastening brackets
6. Post cap

Fixings to the ground should be done properly according to the foundation. Please get appropriate fixing items from the DIY-store.

Scan this QR-code to see the assembly of Palmako Fence Panels!

All fence panels are made of Nordic spruce which is dense, strong, durable and has small knots.

ASSEMBLING FENCE ELEMENT AND TERRACE FENCE

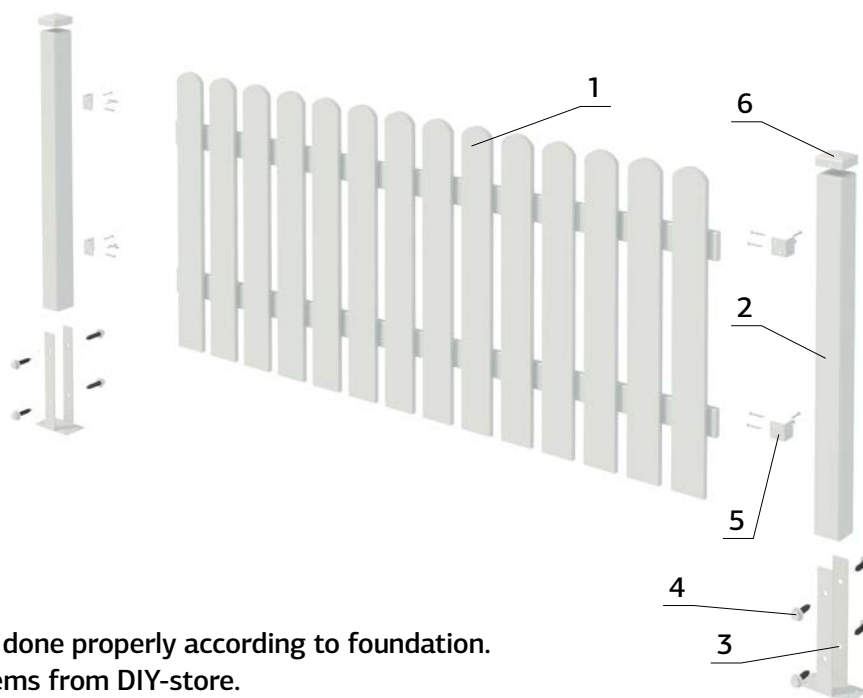

All our fence elements and terrace fences can be easily assembled. If you look at the visuals for the assembly of a fence element or terrace fence below, you will see which products you need and how to assemble them together.

See Optional Products on p. 251 for details.

ASSEMBLING A FENCE ELEMENT

1. Element
2. Post
3. Post leg
4. Screws
5. L-type fastening brackets
6. Post cap

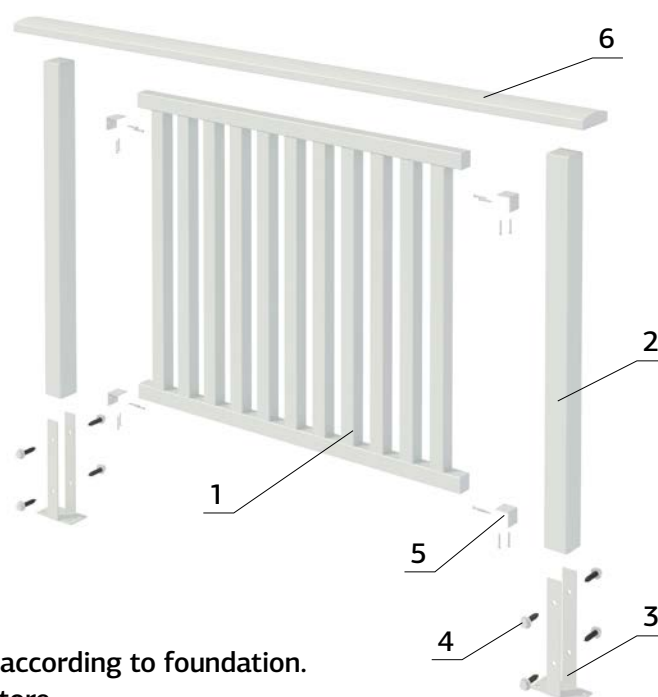

Fixings to the ground should be done properly according to foundation.
Please get appropriate fixing items from DIY-store.

ASSEMBLING A TERRACE FENCE

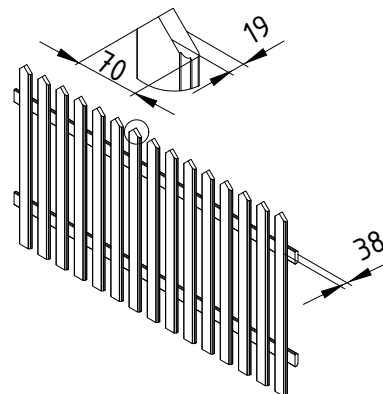

1. Terrace fence
2. Post
3. Post leg
4. Screws
5. L-type fastening brackets
6. Handrail

Fixings to the ground should be done properly according to foundation.
Please get appropriate fixing items from DIY-store.

PALMAKO FENCE ELEMENT LOVISA 10

ARTICLE NUMBER: 108639

Depending on the model of the garage, additional accessories may be required for installation.

Electrical connection required!

ROOFING MATERIAL

To keep your house well protected from the weather, we offer you different types of roof covering materials - roofing felt (suitable as an underlayer), SBS roofing material, shingles or EPDM. The second one, SBS roofing material can be attached in a single layer, but it would be temporary solution and will not last as long as attached in multiple layers. It can be welded on the preplaced bottom layer of roof cladding with a gas burner. Attention! For wooden houses please follow the safety requirements, and if possible please let it be welded by professional roofers. The last, EPDM, is perfect for flat-roof models. We offer shingles in four different colours as follows - black, red, green or brown. You can buy roof covering material in full rolls/packs/ready-cut pieces.

Black roofing felt (underlayer)

SBS roofing material

Black shingles

ROOF COVERING MATERIAL FOR FLAT ROOF HOUSES

Palmako offers quite a wide range of flat roof cabins.

A question that we have always been asked is what to use as waterproof roof covering material for flat roofs? As you notice in the section of "Optional" under each flat roof house there is mention of special rubber roof covering material – EPDM (ethylene propylene diene monomer).

Here are some of the benefits why we truly recommend you to invest in EPDM roof covering material:

- reduces potential condensations problems that can erode performance
- long average service life (can last up to 20 years)
- EPDM is the most dimensionally stable heat resistance membrane and stays flexible even in extremely cold conditions.

EPDM users in colder climate can also benefit from:

- reduced heating costs
- reduced carbon footprint by lowering heating costs
- reduced safety hazard from snow and ice accumulation

We offer EPDM in ready-cut-pieces, the article number of suitable EPDM is given in the table of optional products after every product group and in Optional Products part at the end of the catalogue.

Our EPDM set includes wet-adhesive for installation.

The installation of EPDM is easy, just follow the installation manual enclosed with the product.

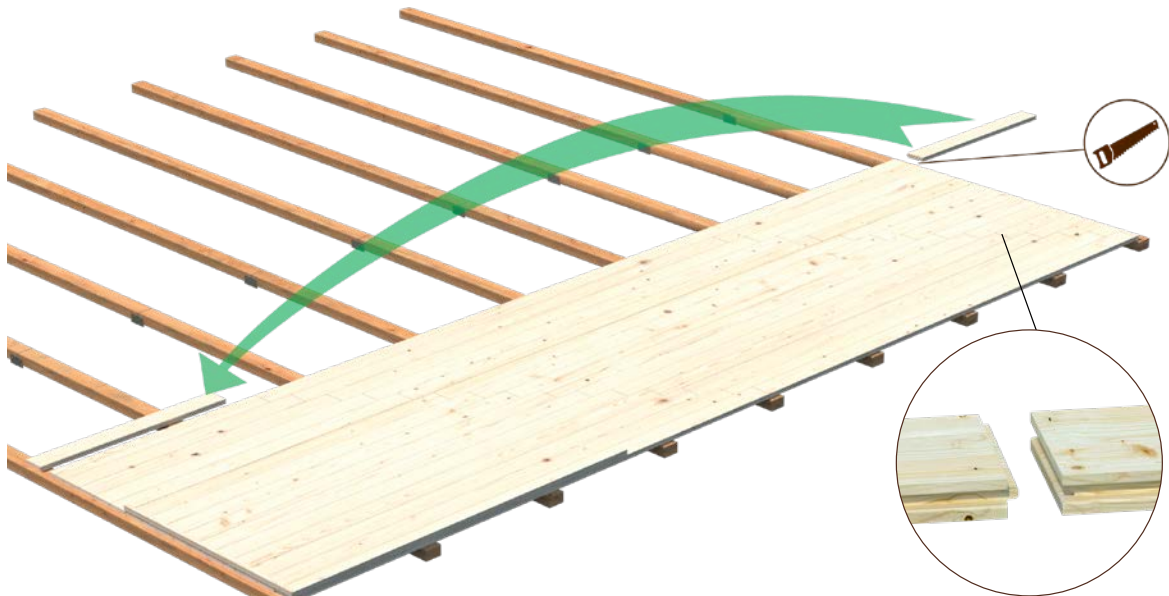

FLOORS

To meet the specific market demands some of our cabins are sold without a floor. Although in majority cases floor can be purchased as an optional extra. As of 2021 Palmako starts to offer unified floor kits in such a cases.

An unified floor kit contains of:

- 19x89x2350 mm double and tenoned needed number of floorboards
- 45x70x3000 mm brown dipped (BNDIP) needed number of foundation beams
- 19x19x2350 mm skirting boards
- 19x19 mm door strip according to the width of the door opening (in two sizes - for a single door and a double door) and the wall thickness.

Due to the different size of cabins and measurements of the floors, please consider below described principle in general in cutting floorboards into the exact measure.

Double end tenoned floor board

House	Art. No.	Floor boards	Additional info

ADDITIONAL DOORS AND WINDOWS

Majority of our cabins and buildings are designed in a way, that one can easily amend it with additional door(s) and window(s) in addition to the existing ones. So far Palmako offered limited range of additional doors and windows. As of 2021 we offer full range of doors and windows suitable to our buildings. For example our cozy and classical cabin Sally 15,5 m² has just one double window in original set. If one wishes a more lightful cabin, it can be easily amended by exactly same type of additional window (Art. No. 103502). As one building can consist of different size and model of doors and windows, please consult with our sales team before placing an order.

- 1 Cabin Sally 15,5 m² with one double window in original set
- 2 Cutting the wall according to the measures of the window
- 3 Cabin Sally 15,5 m² has now two double windows

With standard doors Palmako provides door handle and lock cover kit. Shall one need to change the existing door handle and lock cover kit or just needs one extra, we are more than glad to deliver.

Art. No. 108422

* Article number is given as natural wood (NO treatment). If the house has treatment options, one also can order additional door(s) and window(s) with the same treatment. Just consult with our sales team or representative.

PLYWOOD DOORS

If you have built a garden house, shed or have in your garden some other ancillary building that needs a good and proper door in front of it then please get familiar with doors on this page. We have added to our windows and doors selection single and double doors made of plywood. With or without glass, just as you like the best.

90x90 mm white**
Art. No.: 108302

Treatment as additional protection for wooden products

Production lines and machines allow us to flexibly arrange procedures and to produce a very wide product range from square log houses with different log thicknesses to the element, prefabricated and large weekend log houses. In addition to other wooden products in your garden - fence panels, terrace fences, garden furniture, machine rounded posts, flowerboxes, log rolls and many other products.

Unprocessed wood becomes greyish after having been left untouched for a while and can turn blue and become moldy. Treating wood with a preservative effectively protects against wood-destroying fungi and insects, including termites. Therefore we recommend using our product treatment service. Depending on the product type we are able to treat the products in different ways.

DIPPING

As we have our own treatment baths for brown, grey and clear white dip treatment, cabins and other larger sized items can be ordered treated with Axil 3000 P by the Sarpap & Cecil Industries water-soluble treatment liquid, guaranteeing treatment within classes 1–3. Dipped wood must be finished with at least two layers of topcoat. Topcoat should be applied on the dipped product as soon as possible. In case the dipped cabin is

left unfinished for over six months, the wood protective properties of the dipping liquid will start decreasing.

BNDIP brown dip

GYDIP grey dip

WTDIP white dip

PRESSURE-TREATING

Smaller sized items like furniture can be pressure-treated in the vacuum-pressure-vacuum method giving these items a green or brown shade. Depending on model fence panels can be grey or green pressure-treated or white or grey painted (primer plus two layers of paint). In order to extend the service life of timber we treat our products with Impralit®-KDS wood preservative. This is a water-borne,

chromium-free wood preservative for the prevention of insect attacks, soft rot and fungal decay. It also offers temporary protection against blue stain and mould. Impralit®-KDS is only to be used for treating wood according to the requirements of use classes 1, 2, 3 and 4 as stipulated in EN 335-1. For wood under cover and in the open, above ground and in ground contact, e.g. poles, fencing, playgrounds, pergolas, etc. The preservative penetrates deep into the wood with the help of vacuum and pressure. In this case a vacuum is initially generated in the cell cavities thereby evacuating the air inside them. The cavities are then filled with a preservative solution that is forced into the wood under high pressure. For vacuum pressure impregnation we work with different processes depending on the type of wood, environment and end purpose.

GYVPI grey pressure-treated

GNVPI green pressure-treated

BNVPI brown pressure-treated

PAINTING

We have invested into modern painting technology that enables us to paint smaller sized garden products like fence panels and posts. Today we are able to paint the products white or dark grey, using flowcoating method and spray chamber method. After painting, the products will dry in a 30 meter long drying chamber, where the whole process of drying can be adjusted and observed.

WTPNT1+2 primer + white painted 2 layers (RAL 9016)

GYPNT1+2 primer + grey painted 2 layers (RAL 7016)

WTPNT1+2 primer + white painted 2 layers (RAL 9016)

WTPNT1+2 primer + white painted 2 layers (RAL 9016)

PRIMING

Using the same technique, we are now also able to coat several houses with one layer of white primer (WTPNT1+0), which simplifies the further finishing of the product.

You will find available treatment options next to each product under Treatment Options section. Please get familiar with the article number and description of the treatment we offer as follows:

Art. No.	Description	Treatment
NO	Natural, untreated wood	
BNDIP	Brown dip	
GYDIP	Grey dip	
WTDIP	Clear white dip	
GNVPI	Green pressure-treated	
GYVPI	Grey pressure-treated	
BNVPI	Brown pressure-treated	
GNVPIH4	Green pressure-treated HC4	
GNVPIA	Green pressure-treated NTR-A	
WTPNT1+0	White primer	
WTPNT1+2	Primer + white painted 2 layers (RAL 9016)	
GYPNT1+2	Primer + grey painted 2 layers (RAL 7016)	

Palmako

LEMEKS GROUP

Bringing joy to the garden

Palmako AS is the leading manufacturer of garden and log houses, glue-laminated products and wood pellets. Our product range is wide: square log garden houses, garden cabins, garden sheds, pavilions, carports, tool sheds, children's playhouses, weekend and living houses. We also offer a wide choice of timber products in your garden – fence panels, posts and poles, wooden furniture and log rolls.

Catalogue models are kept in stock year-round for quick delivery throughout the world. Our products are well known for their quality because we use the best raw material available: durable and beautiful Nordic spruce. Palmako is FSC certified and products made from FSC timber have been marked accordingly.

25 years of experience in wood industry has made us one of the leading companies in this area in Europe today.
